

Shelly Kaller, MPH, Project Director. Shelly Kaller has been a Senior Research Associate at the Bixby Center for Global Reproductive Health since 2005, conducting research and evaluation for adolescent health programs. She currently directs the “LARC in Primary Care Settings” study at ANSIRH, which aims to increase access to long-acting reversible contraceptive (LARC) methods among adolescents and young adults through provider training. Ms. Kaller’s experience includes volunteer health education for the Women’s Community Clinic, data management and analysis for a randomized clinical trial on oral contraceptive initiation and discontinuation, data collection for a “mystery shopper” study on

Emergency Contraception provision in family practice clinics, and curriculum development and coordination of student research teams to investigate health topics in their communities. In addition, Ms. Kaller has conducted program evaluations on teen pregnancy prevention programs, school-based health center services, and HIV/STD prevention education in California public schools. Ms. Kaller received her Master of Public Health degree from Columbia University’s Mailman School of Public Health, with an emphasis on population and family health. [510-986-8945](tel:510-986-8945).
