

Diana Greene Foster, PhD, Associate Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; Interim Director, ANSIRH. Diana Greene Foster, PhD, is a demographer who uses quantitative models and analyses to evaluate the effectiveness of family planning policies and the effect of unintended pregnancy on women's lives. Dr. Foster has worked on the evaluation of the California State family planning program, Family PACT. This work demonstrated the effectiveness of the program in reducing the incidence of unintended pregnancy. Dr. Foster created a new methodology for estimating pregnancies averted based on a Markov model and a microsimulation to identify the cost-effectiveness of advance provision of emergency contraception. She is currently leading a nationwide longitudinal prospective study of the health and well-being of women who seek abortion including both women who do and do not receive the abortion. Dr. Foster received her undergraduate degree in Political Economy of Natural Resources from UC Berkeley, her MA in Public and International Affairs from Princeton University, and her PhD in Demography and Public Policy from Princeton University. 510-986-8940.
